

## The new Mitsubishi Shogun – Adventure runs through it!

We are now driving the brand new Mitsubishi Shogun and we rate it highly. Externally, the looks are improved; both three and five door models are reminiscent of the original Shogun concept. New features such as auto-leveling Xenon headlamps with vwashers, rear view camera, satellite navigation system, 860w Rockford sound system and reversing sensors add all round value.

Smoother suspension and a more rigid body results in better handling and a quieter, more stable ride. The steering is crisper and visibility improved. The 3.2 litre direct injection diesel engine is cleaner, more economical and there is increased torque on the manual, greater output power for the automatic and better top-end speed.

## WELCOME

Welcome to the Spring Roxtons Sporting Review. This issue includes a wide mix of sporting opportunities in ten different countries, which should whet your appetite. You can find out more about all of these by calling us and also by visiting our completely redesigned website, still at [www.roxtons.com](http://www.roxtons.com).

On page 13, you will find an article on one shooting destination that we feel is consistently under-rated - Africa. It does not necessarily yield the volume of birds found in Argentina but the variety of game birds and sport is unrivalled. There is wonderful accommodation on offer and the unique safari experience is also perfect for non-shooting partners.

Shooting in the UK is busier than we have ever seen it. Already there is much less flexibility on dates and venues than we would expect this time of year, so please call us soon if you have not booked your shooting for next season.

On the fishing front, our Director of Fishing, Charlie White, visited Belize this winter and rated it highly. One of the great advantages of this destination is that it provides plenty to do for a non-fishing partner, something that many other destinations lack (see pages 14&15).
